Directive 2002/95/EG (RoHS) and 2002/96/EG (WEEE)

To Whom It May Concern:

We hereby we confirm that Bürkert products do not exceed limit values of RoHS directive 2002/95/EU.

Our products are not in the scope of the Directive 2002/96/EG (WEEE) and they do not have to be registered at EAR (Electrical apparatus registration) and are not marked accordingly. Their application is as independent components in plant/machinery construction.

For this reason marking is not necessary.

These guidelines are implemented in the German Electronics equipment law effective July 1st 2006.

We hereby declare that as of this date, all Bürkert products conform to the above mentioned European Standards

It is, therefore, not necessary to issue a declaration of product conformity.

Bürkert is a company dedicated to the protection of the Environment.
We are certified according to ISO 14001 and EU Directive 761/2001 (EMAS certificate, Reg, -Nº. D-13600039)
